

Malaysia Airlines Berhad launches its new fleet of Airbus A350-900 with the well-known brand : Aigner

Malaysia Airlines, which joined Oneworld in 2013, wants to develop a young and modern fleet and orders six A350-900s leased from ALC. They have a three class cabin layout comprising 286 seats with a First Class cabin. It offers four seats in the First Class, 35 seats in the business class and 247 in the economy class. MAB has become the first airline to offer a first-class cabin on Airbus's A350-900 widebody aircraft.

Aeolus worked closely with Malaysia Airlines to develop new amenity kits for Business Class passengers for their new fleet of Airbus A350-900s. Aeolus paid close attention to details and creativity together with the long-standing relationship with Aigner Parfums.

The well-known horseshoe brand embodies European elegance and prestige and has brought excellence through years.

With its White collection, Aigner offers its timeless signature products to the greatest pleasure of Malaysia Airlines passengers whether travelling for business or leisure.

On top of the basic necessities to enhance inflight comfort, passengers will enjoy a full range of Aigner White line skin care products; including a lip balm, a body lotion, a refresher mist and, for the first time on board, the brand mouthwash. Passengers could also enjoy a convenient pouch designed with the exclusive design of the logo : the pouch was designed to have an easier access to all accessories.

Malaysia Airlines Berhad's Airbus A350-900s will operate starting in January 2018.
